CUREM*horizonte* 2023: Can Less Be More?

Johnson throws another \$2 billion at rapid EV transition

OCTOBER 20, 2023 · 19 COMMENTS · 2 MINUTE READ · GILES PARKINSON

“... In 2050, we will still be driving cars, flying planes and heating our homes, but our cars will be electric, gliding silently around our cities, our planes will be zero emission allowing us to fly guilt-free, and our homes will be heated by cheap reliable power drawn from the winds of the north sea...” (Boris Johnson, 2021)
